Upfront Subscription Fee (Maximum Sales Charge)	A subscription charge of up to 5% may be charged against each investors subscription and be payable to third parties for distribution of the Sub-Fund for the applicable share classes.
Early Redemption Fee	Nil

Investment Objective

The Investment objective of the Sub-Fund is long term capital growth and to exceed the performance of the MSCI World Index.

Investment Policy

The Sub-Fund aims to achieve its objective through Investment in a diversified portfolio of listed equity securities invested on a global basis. The Sub-Fund will invest a minimum of 70% in equity securities of mid and large-cap companies, being those with a market capitalisation of at least GBP 1 billion. Although the Sub-Fund may invest in equity securities of companies established, operating and listed in any global market, it is anticipated that the fund will invest a minimum of 50% in equity securities of companies established and listed in the EEA and the USA. The fund may also invest in other transferable securities including UK government and public securities, units or shares in collective investment schemes, money market instruments, cash, and near cash and deposits.

The Sub-Fund uses the 'MSCI World Index' for performance comparison purposes only. The index is not used as a performance target or as a constraint in relation to the composition of the Sub-Fund's portfolio.

The Board of Directors of the Fund and with the consent of the External Manager may change the Investment Objective and/or the Investment Policies and/or Investment Restrictions of the Fund. Any change(s) to the Investment Objectives and/or the Investment Policies and/or Investment Restrictions of the Fund shall be communicated to investors one (1) month prior to the date of the intended changes.

All of the investment methods and strategies used by the Sub-Fund involve the risk of loss that investors should be prepared to bear. Investors are responsible for appropriately diversifying their assets to help guard against the risk of loss.

The Sub-Fund will not use leverage or portfolio hedging techniques.

Investment Strategy

A fundamental research driven approach (based on proprietary analysis) will then be employed to derive a diversified portfolio of investments. There will be a decisive emphasis on a particular size of companies dominating the stock market, hence, the majority of the portfolio will be invested in large capitalisation companies (i.e. greater than USD \$10 billion).

The Fund may take a geographically diversified approach and there are no specified limits on investing in any geographical region or in any sub-sector. The fund targets a 100% allocation toward equities and 100% allocation toward large-capitalization companies. The Fund will invest primarily in equity and equity-related securities listed or traded on Stock Exchanges recognized by HMRC UK.

Companies with a market capitalisation of up to \$300 million are classified as micro-cap, companies with a market capitalisation of \$300 million to \$2 billion as small-cap, companies with a market capitalisation of \$2 to \$10 billion as mid-cap, and companies with a market capitalisation of over \$10 billion as large-cap equities.

Investment in Collective Investment Schemes

The Fund may invest up to 10% of its assets in Funds.

Subject to the foregoing, the Funds in which the Fund will invest, be their UCITS or alternative investment funds, may be largely domiciled in the EU (typically, but not limited to, Ireland and Luxembourg) but may also be domiciled in jurisdictions outside the EU (such as the United States).

All of the foregoing instruments, assets and contracts listed in this paragraph will be referred to in this Offering Document collectively as "Investments", and individually as an "Investment".

Because particular investment decisions will depend upon opportunities at the time, it is not possible to estimate or predict what portion of the assets of the sub-Fund will be allocated to any given underlying asset class at any given time and the actual number of underlying investments may vary and may change materially over time as determined by the External Manager.

In addition, the External Manager shall also:

- a) set out and regularly update an investment portfolio consistent with the duration of the Fund and market conditions.
- b) seek and select possible transactions consistent with the investment portfolio referred to in point (a).
- c) assess the selected transactions in consideration of opportunities, if any, and overall related risks, all relevant legal, tax-related, financial, or other value affecting factors, human and material resources, and strategies, including exit strategies.
- d) perform due diligence activities related to the transactions prior to arranging execution.
- e) monitor the performance of the Sub-Fund with respect to the investment portfolio referred to in point (a).

Investor Profile

The Sub-Fund is suitable for investors seeking moderate growth and have sufficient knowledge and experience. While the Sub-Fund's portfolio is not expected to exhibit high volatility, a potential investor must have experience with volatile products to assess relevant risks efficiently. The Sub-Fund is suitable for investors with an investment horizon of 5 (five) years and more.

The investor must be able to accept losses. There can be no assurance that the investors will recover the assets originally invested in the Sub-Fund as the value of the Sub-Fund may either increase or decrease.

Investors in this Sub-Fund must be willing to assume a relatively low to medium level of investment risk. The risk derives from the price volatility of the securities in which the Sub-Fund invests, especially, as a result of changes at a macro- and micro-economic level.

Portfolio diversification and risk minimization are of paramount importance and risk shall be assessed on individual investments as well as on portfolio level.

Hedged Share Classes

The hedged share classes (EUR and USD) aim to provide investors with a return correlated to the base currency performance of the fund, by reducing the effect of exchange rate fluctuations between the base and hedged currency. It is important to note that the hedge is not perfect - it aims to reduce, not eliminate, currency risk, and mismatches between the currency and the hedged share class may result.

Hedged share classes do not offer:

- Hedging of underlying currency positions within a fund
- Added value through active currency selection
- Exactly the same returns as the equivalent base currency share class

Key considerations:

- Before investing in a hedged share class where it is available, investors should bear in mind that they are electing to gain exposure to the currency of the hedge. This currency may strengthen or weaken against other major world currencies in the future
- All gains/losses or expenses arising from the hedging transactions are borne separately by the investors to the respective hedge share class.

Distribution policy for Income Share classes

The Directors at their discretion may declare a dividend on the Income Share Classes. The Directors may distribute all or substantially all of the net income (interest and dividends, less expenses) of the Fund attributable to Income Share Classes. Dividends shall be payable to such Shareholders of record on the date on which the dividend is declared, in accordance with the number of Shares held of the particular class(es) in respect of which dividends have been declared. A Shareholder will receive distributions of income in cash, which will be transferred to the bank account designated by the Shareholder in the Application Form.
